Cotonou, Benin Republic. B.J | +229 61975355 | [pricelesswilliams1234@gmail.com](mailto:pricelesswilliams1234@gmail.com)

## Summary

I'm a Frontend developer with strong product instincts who takes initiative, moves fast, and constantly looks for opportunities to improve the product. If you value developers who treat the product like their own, who learn fast, obsess over user experience, and build with ownership and care, then I'd love to introduce myself. I approach engineering the same way founders do: thinking end-to-end, validating with users, and owning real outcome

## Core Skills

**Frontend:** React.js · Next.js · JavaScript · Tailwind CSS · Zustand · React Query, Html5, Css3 · Wallet Authentication

**Other:** RESTful APIs · GraphQL · Git/GitHub · Responsive Design · UI/UX · Collaboration · NFT Smart Contracts · Teamwork

## Experience

### Lumecs — Founding Frontend Developer

August 2024 - September 2025

- Engineered a Web3 dApp for a Web3 startup using React, Tailwind, React Query to improve data-fetching performance boosting active user retention by 70% within the first 8 months.
- Integrated Wagmi and Viem for wallet authentication, enabling reliable on-chain interactions
- Collaborated with backend developers to integrate Python RESTful APIs, improving data flow by **25%**.
- Partnered with blockchain teams to implement NFT smart contracts improving on-chain security and reliability.
- Led end-to-end frontend deployment and testing with Cursor AI using Vitest, reducing pre-deployment bugs by 40%

### Fixer — Freelance Frontend Developer

September 2023 - May 2024

- Developed a responsive holiday booking platform using React, Tailwind CSS, Zustand for global state management.
- Collaborated closely with backend teams to integrate backend services, ensuring data security and optimizing system performance.
- Translated Figma designs into polished, responsive UI components, enhancing visual consistency.
- Used React Query for efficient data retrieval and caching, improving load times by 40%.
- Integrated secure Paypal payments, resulting in a 25% increase in successful bookings within two months of launch.

## Featured Projects

### Chatterbox — Real-time Chat App (*In Progress*)

October 2025 - Present

- Developing Chatterbox a social communication platform enabling users to connect, chat and call friends seamlessly.
- Designing a modern responsive interface using React, Next.js Tailwind CSS, Zustand for efficient state management improving UI performance by 60%.
- Integrating real time messaging and voice/video calling using Socket.IO.
- Backend powered by Node.js, Express, and MongoDB supporting authentication, private chats, and media uploads.
- Integrated Firebase Authentication and Google Sign-In to enhance user security and streamline the account registration process by 70%

### Jobiverse — Job Board Platform

June 2023 - August 2023

- Built a Full-Stack Job board using Next.js React, TypeScript Tailwind CSS, AOS, Express, Zustand.
- Optimized Job board performance by implementing lazy loading reducing load time by 75% enhancing user experience.
- Integrated Firebase Auth and real-time database for secure sign-ins and live job data syncing.

## Education

### West African Union University

Expected Graduation Date 2029 | B.S.c in Computer Science.
