Chibueze Williams Obodo

Cotonou, Benin Republic. B.J | +229 61975355 | [Portfolio](#) | pricelesswilliams1234@gmail.com

Core Skills

Frontend: React · Next.js · TypeScript · JavaScript · Tailwind CSS · Zustand · React Query
Web3: Wagmi · Viem · Wallet Authentication · NFT Smart Contracts
Other: RESTful APIs · GraphQL · Git · GitHub · Responsive Design · UI/UX · Collaboration · MongoDB

Experience

Lumecs — Founding Frontend Developer   **August 2024 - September 2025**

- Developed the frontend for a Web3 dApp using React, Tailwind, React Query to improve data-fetching performance boosting active user retention by 40% within the first 8 months.
- Integrated Wagmi and Viem for reliable wallet authentication, improving connection consistency for users
- Worked closely with backend engineers to connect Python REST APIs, reducing back-and-forth failures and improving data flow
- Collaborated with blockchain engineers to ship NFT smart contract features that made on-chain actions more dependable.
- Managed deployment and frontend testing with Cursor AI + Vitest, helping reduce repeated issues before release.

Fixer — Freelance Frontend Developer   **September 2023 - May 2024**

- Created a responsive holiday booking platform with React, Tailwind, and Zustand, improving the mobile experience for users.
- Integrated backend services and PayPal payments, resulting in a smoother booking and checkout flow.
- Converted Figma designs into reusable components that made UI updates faster for the team.
- Used React Query to speed up data-fetching and reduce unnecessary network calls.

Projects

Chatterbox — Real-time Chat App   **October 2025 - November 2025**

- Built a real-time social chat app with messaging, calls, and friend interactions using React, Next.js, JavaScript Tailwind CSS, React Query and Zustand.
- Designed clean, responsive UI and pages with smooth state updates and faster page transitions. Implemented instant messaging and online presence using Socket.IO for a WhatsApp-like experience.
- Developed the backend with Node.js, Express, and MongoDB to support authentication, private chats, and media handling.
- Added Firebase Authentication and Google Sign-In to simplify user onboarding and strengthen account security.

Jobiverse — Job Board Platform   **June 2023 - August 2023**

- Developed a Full-Stack Job board using Next.js React, TypeScript Tailwind CSS, AOS, Express, Zustand.
- Optimized Job board performance by implementing lazy loading reducing load time by 75% enhancing user experience.
- Integrated Firebase Auth and real-time database for secure sign-ins and live job data syncing.

Education

West African Union University
Expected Graduation Date 2029 | B.S.c in Computer Science.
